Pilot Class Student Feedback:

ALL Students:  "Recommend this Course to others"

"I liked how this course made Lean and Six Sigma more approachable in the hybrid format, was easy to follow, enjoyed the breakout sessions, and it was easy to get to know the other participants."

"The learning nodes made the tools relevant with the examples provided and the exercises further solidified the application practice. Overall enjoyed the pilot class and thought it flowed well together."

"I liked the wide range of tools offered, the skills acquired, the experience sharing, and doing it (the pre-session learning) when we want."
